

## FACIAL-DÉCOLLETÉ TREATMENT IN INSTITUTE LASTS ABOUT 20 MINUTES AND IS STRUCTURED IN 4 PHASES:

**1. SKIN-PRE**, Skin Life face scrub is applied to prepare the skin before subsequent treatments, then removed with a sponge moistened with Skin Life tonic.

**2. SKIN-ONE**, only the air flow is applied to prepare the skin.

**3. SKIN-TWO**, pour into the dispenser about 3 / 4ml of Skin Life jalufiller serum with a high concentration of argilerine, hyaluronic acid, elastin and collagen and apply with regular jets, oxygen and product on the skin for 15-20 minutes ( pushing and pulling back the airbrush lever).

**4. SKIN-END**, apply the Skin Life anti-aging cream based on hyaluronic acid, collagen, and natural extracts with soothing and hyper-moisturizing action, or argireline in the presence of many wrinkles.

**N.B.:** the hyper-moisturizing cream should be used on young clients or on oily skin, the acne cream on acne-prone skin; the multipurpose snail slime cream is recommended for wrinkles, sensitive skin and couperose.

6/8 treatments, one a week, then one a month for maintenance.

For an even more complete result, let's not forget the home maintenance product: Skin Life anti-aging cream (it was also used in the final treatment in the institute), milk or tonic or facial scrub.

Even the Skin life jalufiller serum can be given at home after 6/8 treatments.

**OXYPLATINUM**  
THE WELLNESS  
WITH OXYGEN

## WHY USE THE OXYGEN TREATMENT?

The use of oxygen for skin imperfections was born in the early 2000s following the discovery that **the skin needs at least 5 liters of oxygen per day** for its functions. With age and due to numerous imperfections, less oxygen reaches the skin and its appendages and leads to premature aging. **The Rebitalia OXYPLATINUM face and hair system**, born in 2015, progressively improved, offers an integrated **treatment of the hair and face**.

**It cleans** the pores, normalizes sebaceous secretion, eliminates dandruff and reduces skin redness.

**It deeply** nourishes and oxygenates, combining high quality products with the powerful action of oxygen.

**Stimulates** and re-mineralizes, helping brittle and debilitated hair.

It helps natural hair regrowth by stimulating the growth of healthy and thick hair.

**It helps** the natural beauty of the hair, making it softer, shinier and full of volume.

**Increases** the duration and brilliance of the color.

**It helps** the relaxation of wrinkles, the improvement of acne, hyper-pigmentation spots and the imperfection of scars.

**Oxygen** as a treatment not only for the skin of the face and body, but also for thick and shiny hair, is therefore possible.

**The hair treatment in the institute lasts about 20 minutes and is divided into 4 phases, we recommend six treatments in the shop, one a week, then one a month for maintenance.**

- 1. HAIR-PRE**, Bionatural revitalizing or energizing anti-hair loss bath is applied to clean hair and scalp before the next steps, then partially dry the hair.
  - 2. HAIR-ONE**, only the air flow is applied to prepare the skin.
  - 3. HAIR-TWO**, pour about 5ml of **Lotion Stem**, plant stem cells and 5% peptides into the dispenser and apply the mixture of product and air with regular flows on the scalp for 15-20 minutes.
  - 4. HAIR-END**, a few minutes after the previous application, apply a **vial or the vitalizing or energizing anti-hair loss lotion** based on plant stem cells, serenoa, vitamins, proteins and natural extracts with a delicate 5-minute circular massage or shiatsu, then do the unloading.
- For a complete reinforcing anti-hair loss result, let's not forget the product for the maintenance at home of the treatment: **Bionatural vitalizing or energizing bath and lotion in drops**.

For treatments in case of hair loss in the presence of dandruff and grease in point 1 use **Bionatural Tea Tree bath**, in point 4 use about 15/20 drops of **Bionatural Tea Tree lotion** and also for maintenance at home. In the presence of sebum only, use **Detoxy Plus lotion**; then wash off with **Detoxy plus shampoo**; conclude with a few drops of **Detoxy Plus lotion** with a 2-minute massage in the drain.

### **Anti-dandruff treatment and seborrheic dermatitis:**

- 1. HAIR-PRE**, Bionatural Pityremove bath or Pityremove washing oil is applied to clean hair and skin before the next steps, rinse well and partially dry the hair.
  - 2. HAIR-ONE**, only the air flow is applied to prepare the skin.
  - 3. HAIR-TWO**, pour about 5ml of **Lotion Stem** (plant stem cells and peptides) into the dispenser and apply the mixture of product and oxygen with regular flows on the scalp for 15-20 minutes.
  - 4. HAIR-END**, a few minutes after the previous application, apply 15/20 drops of **Pityremove lotion** based on piroctone olamine and natural plant extracts with a gentle 2-minute discharge massage.
- For an even more complete result, let's not forget the home maintenance product: **Bionatural Pityremove bath and Bionatural Pityremove lotion**.

### **Structure treatment for damaged, fine, brittle, dull hair:**

1. Wash with **Nutry Keratin intensive bath** for hair cleansing. Apply the mask and then rinse.
  2. Pour about 3ml of **Nutry Keratin jaluronic** into the dispenser and apply the air product mixture to the hair with regular flows. (the product is thick, then add 8/9 drops of tonic and mix).
  3. Apply a few sprays of **Nutry Keratin spray milk elixir 10 in 1** and go to the desired style.
- For an even more complete result, let's not forget the product for maintaining the treatment at home: **Nutry Keratin intensive bath and Nutry Keratin smoothing air tonic** to protect and plump.
